

EasyLink

Field friendly. Field tough.

Innovative ENG Vans for Today's News Business

EasyLink™ Live News Vans provide the most flexible mobile news gathering system in the business. Customers can choose a design that fits their station's needs from one of five innovative floor plans. E-N-G can deliver rack-ready or fully-integrated vans with the electronics of your choice. In today's environment of limited resources, a turnkey solution can save customers time and money. In either case, the ultimate result is an impeccably-constructed machine that anticipates and fulfills your every need, every day.

EasyLink™ vans are built on the workhorse Ford E-350 Standard and Super Cargo Van chassis. A long list of field-friendly features comes standard with every EasyLink™ system.

E-N-G designs and engineers its systems for maximum reliability, simplicity of operation and ease of maintenance. Add in E-N-G's fast quotations, competitive pricing, responsive service network and nationwide overnight parts delivery, and you'll see why these EasyLink™ ENG vans are the choice of leading stations throughout America.

Five Field-Proven Designs

Standard Features

A fully-equipped vehicle with modifications such as insulation, ceiling and wall panels, racks, storage shelves and cabinets, generator, commercial power input, power control panel, complete AC, DC and AV wiring, interior and exterior lighting, AV input/output panels, pneumatic mast and air systems with safety features, pan & tilt system, step bumper, aluminum roof platform and stainless steel ladder.

Optional Equipment

A full range of masts, larger generators, second generators, modified roof platforms, cable reels, battery chargers and inverters, roof air conditioners, GPS systems, alarm systems and many other items.

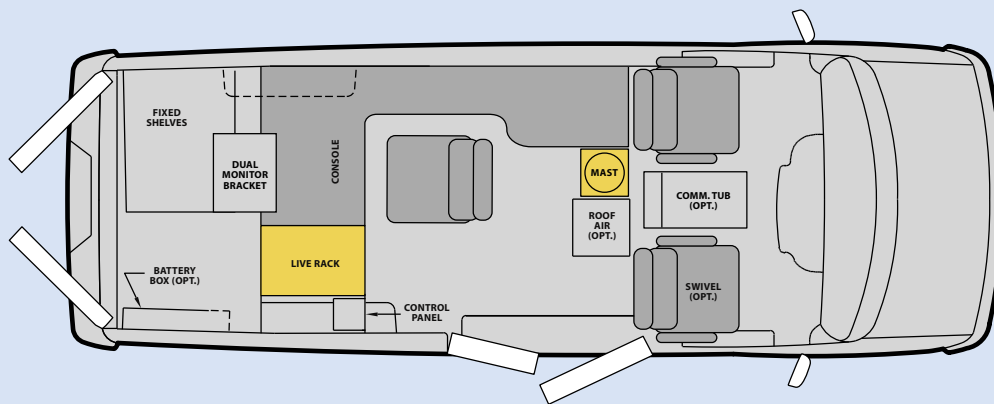

Rack Ready or Turnkey Systems

E-N-G will complete the system to fit any requirements. Rack-ready systems include clearly labeled wiring runs to agreed locations, with equipment added or deleted to mesh with the vehicle being replaced. Turnkey systems include any combination of E-N-G or customer-supplied equipment, expertly integrated and ready for operation.

Vehicles

Ford E-350 Standard and Super Cargo vans, power steering, power brakes, air conditioning, AM/FM radio, captain's chairs, heavy duty cooling, tinted glass, 6.8L V10 gasoline engine, or 6.0L V8 deisel engine, 4 speed OD auto transmission.

EasyLink 1S

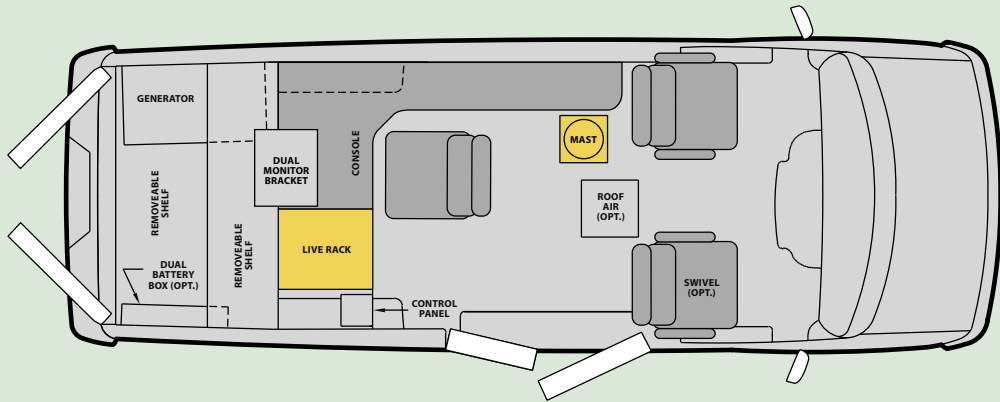

EasyLink 1S

The EasyLink 1-S design is built on a Standard Cargo van platform with the same wheelbase as the Super Cargo Van but with shorter overall length, making it adept at maneuvering in crowded metropolitan areas. The layout has the control panel and electronics rack placed next to the curb side door for easy access. The console is designed specifically for laptop editors, with a monitor shelf positioned above the editors station and outside the equipment rack.

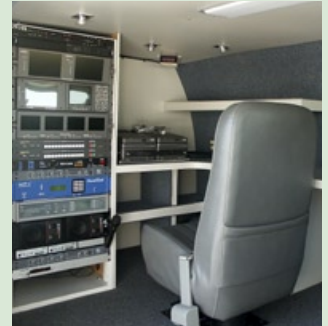

EasyLink 1L

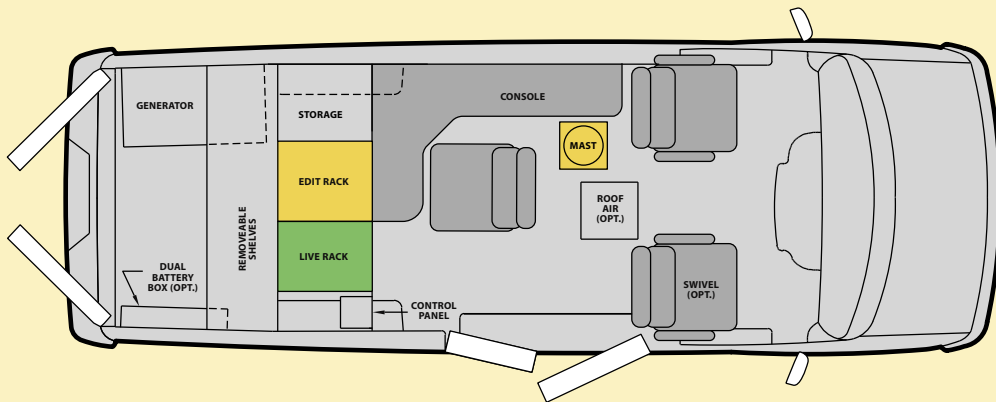

EasyLink 1L

Combining the single rack design of the popular 1-S van, with the roominess of the Super Cargo Van chassis, the 1-L offers the most spacious design of the EasyLink family. For maximum cargo and storage space, with longest wrap around console, this design provides ample work area for both a reporter and editor.

EasyLink 2

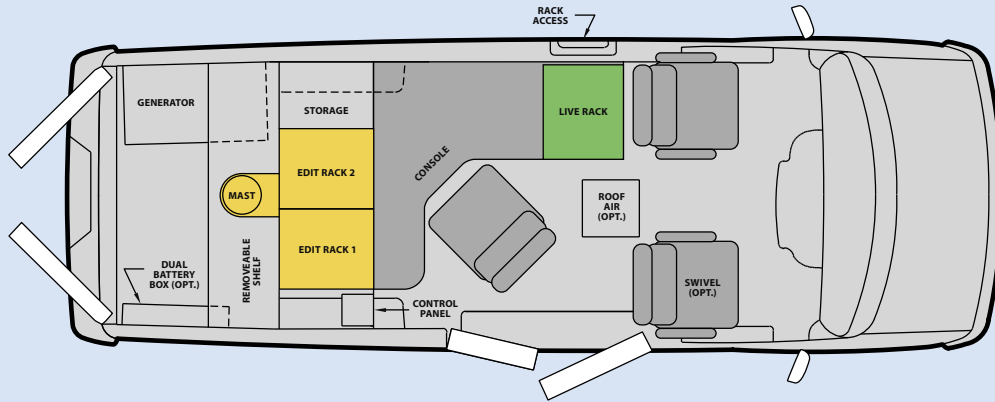

EasyLink 2

The newest model in the line is popular for its easy access to the control panel and live rack from the outside of the van, even while editing is in progress. Two full-height racks provide ample space for editing and basic live rack equipment. The wrap-around console and storage shelves can be customized to fit the customer's unique operating and editing requirements.

EasyLink 2+

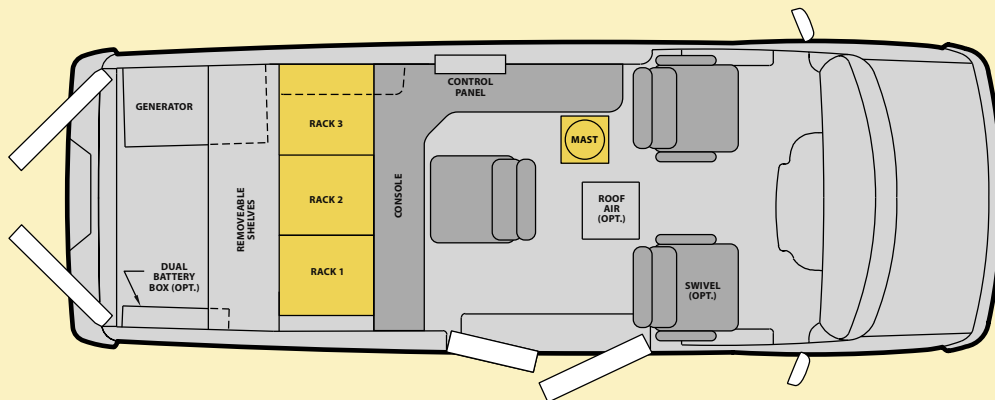

EasyLink 2+

A combination of the model 2 with an additional live rack, this van gives maximum rack space for small-scale field production and daily news coverage. The separation of the live rack from edit racks allows two operators to work without crowding each other. The GullWing door provides instant access to the back of the live rack. The console design can be tailored to specific editing equipment, and the mast is located in the rear.

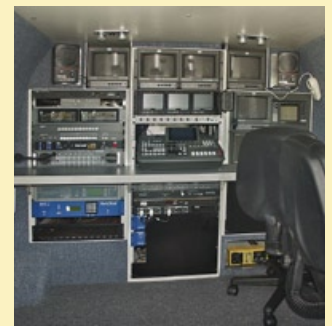

EasyLink 3

EasyLink 3

This model features the familiar three rack layout with maximum rack space above the console. The three-racks-across allows side-by-side editing plus separate Live Rack. The mast is offset behind the driver. E-N-G's wall mount control panel folds down for easy service. Our side-mounted generator and removable shelves provide quick access to rear of racks.
